

Orchard Park Farm, Hornblotton, Shepton Mallet, BA4 6SF

If you're looking for forest school activities, woodlands, tree identification, plants and growth, habitats, life cycles or anything based around the countryside then this is the place for you. With hundreds of acres of woodland and orchards it's the best place to bring your class and explore. It's set up with toilets, hand washing facilities and a covered eating area and although we don't do a whole topic on it there are some huts so we can take a look at an ancient style camp. There are some newt ponds and a separate pond to try your hand at pond dipping. The woodland is very natural and the home to birds of prey, deer, bugs and many other animals. A wonderful place for an adventurous day with good access for the coach!

On your visit you have many activities to choose from, we are able to do the following:

Den building

Pond dipping

Bug hunting

Life cycles

Tree and plant identification

Forest school activities

We can light a small camp fire for marshmallow toasting, just let us know if this is something you would like to do and bring your own marshmallows.
