

Maundrils Farm

68 Main Road, West Huntspill, HIGHBRIDGE, Somerset, TA9 3QS

Visit Joe and Rachel at Maundrils Farm, an organic farm that rears beef cattle. Meet their young and older cattle.

They have thriving bee hives and ponds, you can wander the fields and hedgerows, learning about lots of different animals and their habitats. Joe and Rachel are also taking part in a water vole habitat restoration project and have had a hibernaculum built for reptiles to use to hibernate over winter.

You can also learn about plants and growing and spend some time in a fully established vegetable plot learning about food and where it comes from.

For those looking for something more the farm can also offer talks about herb rich pastures, the nitrogen cycle and soil health, plus, if you are up for a bit of a walk, you can see the wetland habitat and learn more about the wildfowl and wading birds which use the farm's coastal grazing.

We can tailor the day to suit you, whether that's a half day or whole day and fit it in to your learning program.
